# Get to know Aysin Technology closely!

Since its establishment, Aysin Technology has been operating to strengthen the IT infrastructure of businesses and meet their technological needs. Our headquarters is located in Gaziantep and we offer solutions both locally and nationally with our wide range of services.

We aim to reach more and more businesses every day with our team specialized in technical support, maintenance, repair and hardware supply for corporate companies to have an uninterrupted and reliable IT infrastructure.

While optimizing your printing processes with printer, photocopy and toner solutions, we extend the life of your devices with our technical services and ensure an uninterrupted workflow.

In a world of constantly developing technology, we facilitate business processes by offering fast, reliable and economical solutions that businesses need. We act with the vision of being a reliable business partner in the sector by prioritizing customer satisfaction above all else. As Aysin Technology, we are here to contribute to the technological transformation of businesses!

# Our Services

Aysin Technology offers you a wide range of services.

CCTV Camera  
Solutions

Network  
Systems

Server  
Systems

Fiber Optic  
Systems

Elektronik  
Warfare Solutions

Solar Energy  
Systems

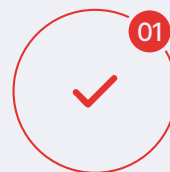

Photocopy  
Services

Printer & Toner  
Solutions

Our transparent service flow,  
makes you always  
feel safe!

Identify the  
service you require.

Create a  
planning with us.

Enjoy the  
perfect service!

# CCTV Camera Solutions

Aysin Technology designs and implements Urban Security Management Systems to meet the security needs of cities and institutions at the highest level. In this context, it offers integrated security solutions such as camera monitoring infrastructures, emergency management panels, traffic monitoring and license plate recognition. These systems, which enable real-time data collection and analysis, especially in crowded areas, play a critical role in maintaining public safety and order.

Aysin Technology meets the end-to-end security needs of cities and institutions by providing services with its expert team at all stages from project planning to installation and maintenance.

- Advanced security solutions
- Integrated alarm systems
- 24/7 monitoring support
- Remote access possibility
- Smart analysis and reporting
- High Resolution

# Network Systems

Aysin Technology offers advanced network infrastructure solutions to ensure uninterrupted corporate communication and data flow. Local area network (LAN) installations, wide area network (WAN) connections, wireless network management and cyber security measures are the main elements of these solutions. Thanks to the fast and secure management of data traffic, companies increase their productivity and protect against cyber threats.

Aysin Technology offers a comprehensive service package from network design and configuration to monitoring and maintenance services.

- High speed infrastructure
- Secure data transfer
- Unique connectivity solutions
- Corporate VPN support
- Advanced band management
- 24/7 technical service

# Server Systems

Server infrastructure forms the basis of corporate data and applications. Aysin Technology designs, installs and manages a wide range of server systems from small-scale businesses to large corporate structures. In addition to physical server solutions, it creates scalable infrastructures suitable for the needs of institutions with virtualization technologies and cloud integration.

Data security and business continuity are ensured through regular maintenance and updates, so that companies can continue their critical operations smoothly.

- High performance servers
- Data backup and recovery
- Custom server configuration
- Strong security measures
- Virtualization solutions
- 24/7 technical service

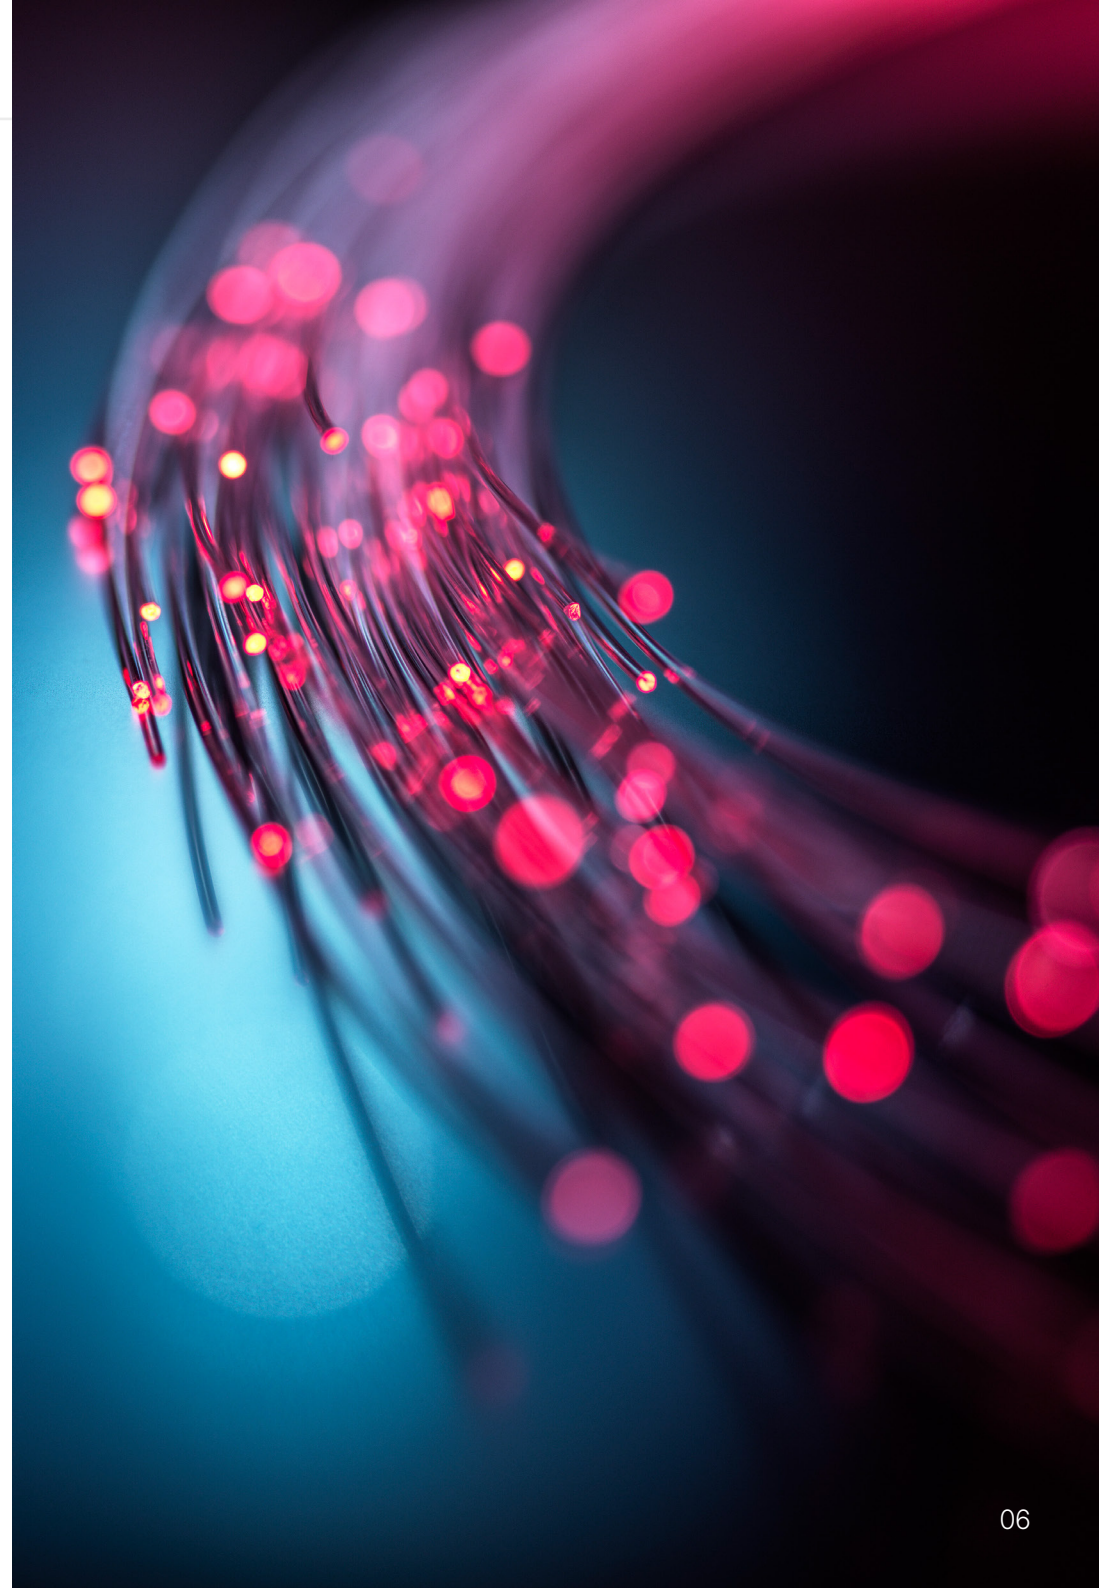

# Fiber Optic Systems

The need for high-speed and uninterrupted data communication is among the most important technology requirements of today. Aysin Technology maximizes the data transfer speed of businesses by offering fiber optic cabling and infrastructure solutions. Especially in large-area campuses, factories or corporate buildings, fiber optic infrastructures offer high bandwidth, low latency and long-distance data transfer.

The expert team provides professional support every step of the way, from project analysis to cabling installation and final testing.

- Fast data transmission
- Long distance connections
- Durable infrastructure
- Low latency times
- Installation and maintenance
- Seamless connection

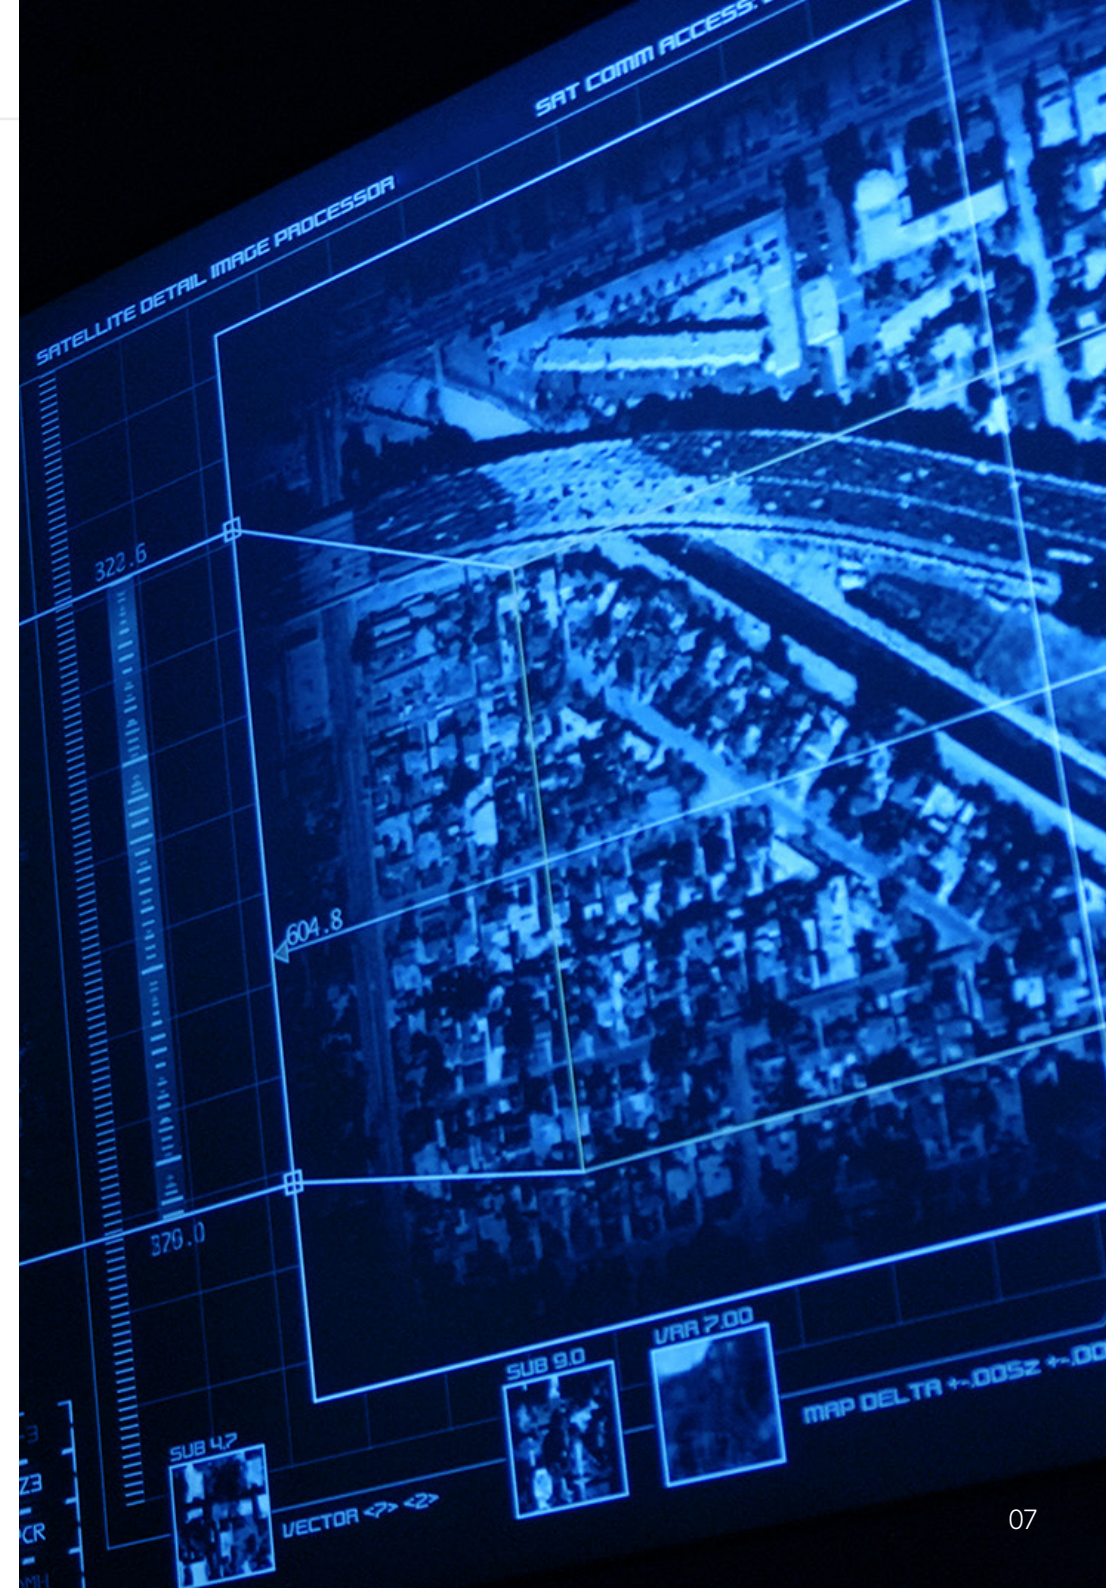

# Electronic Warfare Systems

Aysin Technology develops advanced Electronic Warfare Systems for the defense industry. These solutions, which have critical functions such as analyzing radar and communication systems, signal jamming and electromagnetic spectrum management, provide strategic superiority in military and security fields.

Prioritizing quality and reliability in all processes from project design to field integration, Ayasin Technology focuses on strengthening the defense capabilities of our country.

- High technology
- Jammer systems
- Advanced radar systems
- Security at the military level
- Data security and encryption
- Suitable for special projects

# Solar Energy Systems

Today, when sustainable and environmentally friendly energy sources are gaining importance, Aysin Technology is specialized in solar energy systems. It offers services with its professional team in the design, installation and commissioning of solar panels. Aysin Technology, which carries out projects at various scales from residences to industrial facilities, reduces the costs of businesses and minimizes environmental impact by increasing energy efficiency.

With its long-term maintenance and monitoring services, it ensures that the systems operate at high performance at all times.

- High efficiency
- Advanced project design
- Durable material
- Integrated monitoring & analysis
- Sustainable
- Environmentally friendly

# Photocopy Services

To increase efficiency in document management, Aysin Technology offers photocopying services for corporate and individual use. For institutions with high-volume printing needs, printing processes are optimized by providing appropriate device selection, installation and technical support.

Thanks to periodic maintenance agreements and spare parts supply, customers can meet their document needs without disrupting their workflows.

- High quality devices
- Economic solutions
- Fast printing services
- Corporate and individual use
- Low energy consumption
- Maintenance and technical support

**Southeastern Anatolia  
Regional Representative**

# Printer & Toner Solutions

Aysin Technology offers comprehensive solutions for the sales, maintenance and repair of various brands and models of printers. While maximizing print quality and device life with original toner and cartridge supply, it also increases customer satisfaction by providing cost-effective alternative options.

Thanks to the periodic maintenance of the technical team, the risk of failure is minimized and businesses save time and cost.

- High diversity
- Original products
- Fast technical service
- Economic solutions
- Expert advice
- Optimum performance

# Solution Partners

As Aysin Technology, we offer the most innovative and high quality solutions to our customers thanks to the strategic business partnerships we have established with the leading and reliable brands of the sector.

**Quality partners**  
**powerful solutions!**

# Our References

Aysin Technology offers innovative services to its customers with its successful projects in urban security, network, server and energy solutions. The projects we have realized are the most concrete indicators of our business partnerships and customer satisfaction.
